

Solutions

VARIANDO SOLUTIONS

The web site you are now viewing, was built by using Variando's very own, safe and fast web publishing solution, the Variando Web Platform

SOFTWARE

Variando produces by itself most of its computing solutions, including a platform used to create all company web sites. In addition we also produce and maintain bespoke computing solutions, and offer them by using a software as a service model.

PUBLICATIONS

We have years of experience in designing and publishing of various types of documents, and our expertise is at your disposal. Our graphical designers assist you to create exactly the type of publication you need - and it can even be a ready made web site.

SOUND SYSTEMS

Variando has a variety of sound equipment, such as microphones, sound mixers and loudspeakers, suitable for different types of premises and requirements. We can provide equipment and personnel to take care of sound systems in small scale concerts and symposiums.
